[Report a data error here](#)**Abstract of EP1001179**

The ball bolt (10) has connecting structures on at least one side. There is a journal (13) on the side of the ball bolt opposite the turning component (7). The ball head fitting (9) has a breakthrough (14) in the side opposite the aperture of the pan-shaped recess (12). The piston rods (8) of working cylinders may have such ball head fittings on them.
